## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2,4,6,8,10 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites a first and a second plane. However this recitation is vague in that it is not clear what the plane is referring (i.e. a plane of what?). Clarification is required.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1,3,5,7,9 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent #5,617,683 to NEY. NEY discloses the use of a window covering (10) including a first and second plane of material (28) having a polycarbonate core (26) disposed therebetween, column 2, line 56; at least one stile (22) disposed in contact with both the first and second

Art Unit: 3635

materials (28); and a hinge (14). Regarding claims 3,7,9 and 11, the stile has substantially the same length as the first plane of material (28) and the first plane of material is a screen that is inherently known to have a non-uniform thickness. In reference to claim 5, the first plane of material (28) is attached to the core (26) by an adhesive (30).

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. Claims <sup>1,051,848, 1,505,613, line 62</sup> 2,4,6,8,10 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent #5,617,683 to NEY. NEY discloses the use of a window covering (10) including a first and second plane of material (28) having a polycarbonate core (26) disposed therebetween, column 2, line 56; at least one stile (22) disposed in contact with both the first and second

Art Unit: 3635

materials (28); and a hinge (14). NEY discloses the basic claimed invention except for explicitly stating that the first and second plane of material is PVC. NEY does disclose a plastic material; however, NEY is silent with respect to the type of plastic material. Although NEY does not disclose plastic, PVC is well known in the art as a plastic material. It would have been obvious to one having ordinary skill in the art at the time the invention was made to select a known material on the basis of its suitability for the use intended as an obvious matter of design choice. In areas where long term durability is a factor, it would have been within the general skill of a worker to form the covering out of plastic. In other areas, especially where durability is not important, other materials may be suitable. Regarding claims 4,8,10 and 12, the stile has substantially the same length as the first plane of material (28) and the first plane of material is a screen that is inherently known to have a non-uniform thickness. In reference to claim 6, the first plane of material (28) is attached to the core (26) by an adhesive (30).
